# USE CASE FLOWS & USER STORIES

Below is the detailed continuation of each UC with:

1. **Platform / Actors**
2. **Main Flow**
3. **Alternative / Exception Flow** (if any)
4. **User Stories**

## UC-SA-001 — Create / Manage Super/Sub Agent Hierarchy

**Platform:** Platform Backoffice
**Actors:** System User

**Main Flow:**

1. System User navigates to **Agents** under **User Management**.
2. Selects “New Agent” button or opens an existing agent.
    - New Agent (Super-agent):
        i. Username, Email, Phone Number.
        ii. Password autogenerated and sent via email.
    - New Agent (Sub-agent):
        i. Username, Email, Phone Number.
        ii. Assign to another agent that does not have a parent.
        iii. Password autogenerated and sent via email.
    - Existing Agent (Super-agent):
        i. Links/Unlinks sub-agents.
        ii. Edit or Suspend/Activate
    - Existing Agent (Sub-agent):
        i. Change/remove parent; sub-agent becomes super agent.
        ii. Edit or Suspend/Activate
3. System validates and prevents loops (child can’t be parent for another child).
4. If agent has no parent, then he is Super Agent, else he is Sub-Agent.

**Alternative Flow:**

- If agent already belongs to another hierarchy, system prompts confirmation to transfer.

**User Stories:**

- *As a system user*, I want to assign sub-agents to a super agent so that I can organize agent relationships.
- *As a system user*, I want to view and edit hierarchy structures so that I can manage agent networks efficiently.

## UC-SA-002 — View Agent Hierarchy

**Platform:** Platform Backoffice, Business Dashboard
**Actors:** System User, Super Agent

**Main Flow (System User):**

1. System User opens/expand a "Super Agent"
2. System shows list of all sub-agents under this super agent.
3. System User can expand/collapse nodes to navigate.

**Main Flow (Super Agent):**

1. Super Agent opens "My Agents" section.
2. System displays only their child agents with their details and balances/transactions.

**User Stories:**

- *As a system user*, I want to see the entire agent hierarchy list so I can track network size and structure.
- *As a super agent*, I want to see my child agents so I can monitor my team.

## UC-SA-003 — Manage Sub-Agents

**Platform:** Business Dashboard (Super Agent)
**Actors:** Super Agent

**Main Flow:**

1. Super Agent selects "My Agents."
2. Adds a new sub-agent by filling in required info (Username, Email, Phone Number).
3. Password autogenerated and sent via email.
4. Edits or suspends existing sub-agent profiles.

5. System validates inputs and updates records.

**User Stories:**

- *As a super agent*, I want to add new sub-agents so I can expand my team.
- *As a super agent*, I want to edit or suspend sub-agents so I can maintain control over my network.

## UC-SA-004 — Transfer Funds to Sub-Agent

**Platform:** Business App / Dashboard
**Actors:** Super Agent

**Main Flow:**

1. Super Agent selects a sub-agent.
2. Chooses “Transfer Funds.”
3. Enters amount and optional note.
4. System checks balance sufficiency.
5. Sub-agent accepts transfer.
6. Transaction recorded, and balances updated for both wallets.
7. Confirmation message displayed.

**Alternative Flow:**

- Insufficient funds → system rejects transfer.
- Settlement transactions can’t happen on a sub-agent, only super-agent

**User Stories:**

- *As a super agent*, I want to transfer balance to sub-agents so they can handle their customer operations.
- *As a sub-agent*, I want to receive balance updates instantly.

## UC-SA-005 — Collect Funds from Sub-Agent

**Platform:** Business App / Dashboard
**Actors:** Super Agent

**Main Flow:**

1. Super Agent selects “Request Funds.”
2. Inputs the amount to collect.
3. Sub-agent is notified and accepts the request.
4. System validates available balance.
5. Transaction executed and logged.
6. Super Agent notified of collection.

**Alternative Flow:**

- Sub-agent balance insufficient → system prevents transaction.
- Settlement transactions can’t happen on a sub-agent, only super-agent

**User Stories:**

- *As a super agent*, I want to collect funds from sub-agents so I can settle daily or weekly revenues.
- *As a sub-agent*, I want to be notified when I receive a request from my parent agent.

## UC-SA-006 — View Sub-Agent Transactions/Balances

**Platform:** Business Dashboard, Platform Backoffice
**Actors:** Super Agent, System User

**Main Flow:**

1. User selects an agent and can filter by date range/currency/transaction type.
2. System retrieves and lists all transactions performed by the sub-agent(s).
3. Filters and export options available.

**User Stories:**

- *As a super agent*, I want to see my sub-agents’ transactions so I can track performance.
- *As a super agent*, I want to see my sub-agents’ balances.
- *As a system user*, I want to audit sub-agent activity for compliance and risk management.

## UC-SA-007 — Commission Distribution

**Platform:** System (Automated), Platform Backoffice
**Actors:** System, System User

**Main Flow:**

1. When a transaction occurs, the system calculates commissions based on configured rules.
2. Super agent and sub-agent portions are distributed automatically.
3. System User can review or adjust commission configuration.

**User Stories:**

- *As a super agent*, I want to earn commission automatically from my sub-agents' activity.
- *As a system user*, I want to define commission rules per agent type to control profit margins.

**Example (Cash-in/ Cash-out):**

- *Consumer pays Fees to Profit & Loss Account (Cash-out)*
- *Profit & Loss pays commission to Super-agent*
- *Profit & Loss or super-agent pays commission to sub-agent*

## UC-SA-008 — Permissions & Limits Management

**Platform:** Business Dashboard, Platform Backoffice
**Actors:** Super Agent, System User

**Main Flow (Super Agent):**

1. Opens sub-agent profile.
2. Adjusts transaction limits or permissions:
    - Limits:
        i. Balance Ceiling.
        ii. Max Cash-in/out per day/month.
    - Permissions:
        i. Cash-in
        ii. Cash-out

iii. Services (G2G, Telia Plus, Airhub, ...)

3. Confirms and saves changes.

**Main Flow (System User):**

1. System User can override or define default limit templates per agent.

**User Stories:**

- *As a super agent*, I want to set limits for each sub-agent so I can control their operations.
- *As a system user*, I want to enforce default limits across all super agents to ensure compliance.

## UC-SA-009 — Performance & Reporting

**Platform:** Business Dashboard
**Actors:** Super Agent

**Main Flow:**

1. User navigates to Reports.
2. Selects scope (transactions, revenue, commission).
3. System generates analytics with filters (date, currency, agent).
4. Charts or exports available.

**User Stories:**

- *As a super agent*, I want to analyze sub-agent performance so I can identify top performers.

## UC-SA-010 — Sub Agent Transfer Ownership

**Platform:** Platform Backoffice
**Actors:** System User

**Main Flow:**

1. System User selects a sub agent.
2. Chooses another Super agent as parent.
3. System reassigns sub-agent accordingly.

**Alternative Flow:**

1. Ownership cannot be changed if monetary transactions are involved, or the sub-agent has balance.

**User Stories:**

- *As a system user*, I want to transfer sub-agents between parents so I can maintain hierarchy integrity.

## Summary by Platform

| Platform | Related Use Cases | Key Actors |
|---|---|---|
| **Platform Backoffice** | UC-SA-001, UC-SA-002, UC-SA-006, UC-SA-007, UC-SA-008, UC-SA-010 | System User |
| **Business App / Dashboard** | UC-SA-002, UC-SA-003, UC-SA-004, UC-SA-005, UC-SA-006, UC-SA-008, UC-SA-009 | Super Agent, Sub-Agent |
